PROFILE

A Computer Science graduate with 2 years of professional experience in full-stack application development. Passionate about writing clean, efficient code to build high-quality, user-centric enterprise solutions. Experienced in handling the entire development lifecycle from architecture and database optimization to public deployment while continually adopting new technologies to deliver impactful business software.

WORK EXPERIENCE

PT SUCOFINDO (PERSERO) (Mar 2026 – Present)

IT Staff | Full-time

- Maintained and optimized existing full-stack applications to ensure reliable daily operations.
- Developed and deployed new web innovations from scratch to production, significantly improving user workflow efficiency.
- Provided technical support and resolved device-related issues for internal team members to minimize downtime.

PT Deptech Digital Indonesia (June 2025 – Feb 2026)

PHP Developer | Full-time

- Developed various applications including Point of Sale (POS) systems and websites.
- Expertly utilized PHP with both CodeIgniter and Laravel frameworks.
- Adapted to various client requirements by working with modern frontend and backend technologies such as React, Next.js, Angular, and NestJS.

Alturian Indonesia (July 2024 – June 2025)

Software Engineer | Full-time

- Responsible for the full-stack maintenance and development of various enterprise solutions.
- Focused on optimizing business operations, supply chain, and data management for clients.
- I design, build, and optimize critical business systems, including ERP, retail management, HRIS, and other business-supporting applications.

- My role involves bug fixing, performance optimization, and new feature development using **Laravel** and **Angular**.

EDUCATION

- **Telkom University Purwokerto (2020 – 2024) | Computer Science / GPA: 3.87**
 - **Achievements:** Speaker at the 2023 Centive National Seminar
 - **Relevant Courses:** Basic Programming, Functional Programming, Object-Oriented Programming, Web Programming, Algorithms and Data Structures, Database Systems, Software Project, Mobile Programming, Computer Networks, Introduction to Cybersecurity, Cryptography.
 - **Thesis:** Design and Development of a Web-Based Village Letter Submission Service System (Case Study: Sambeng Village, Pemalang Regency).

CERTIFICATIONS

- **National Professional Certification Agency (BNSP) 2024 | Junior Web Developer Occupational Scheme**

SKILLS

- **Programming Languages:** PHP (Experienced), JavaScript (Experienced), TypeScript (Familiar), Python (Familiar), Java (Familiar), Golang (Familiar)
- **Frameworks & Technologies:** Laravel (Experienced), NestJS (Familiar), Angular (Experienced), ReactJS (Familiar), NextJs (Familiar), VueJS (Familiar), Tailwind CSS (Experienced), REST API (Experienced)
- **Databases:** MySQL (Experienced), PostgreSQL (Familiar)
- **Version Control:** Git, GitHub, GitLab
- **Architectures & Concepts:** Microservices, RESTful APIs
- **Development Tools:** Visual Studio Code, Postman, Figma, Trello, ClickUp, Jira

PROJECTS

ERP & Retail System Development | Full-Stack Developer

- **Tech Stack:** Laravel, Angular, MySQL
- Designed and built various enterprise solutions for leading retail clients, to optimize business operations, supply chain, and data management.
- **Key Contributions:**
 - Developed a comprehensive retail management system (product, stock, sales transactions) with an analytics dashboard to support strategic decision-making.
 - Built multiple enterprise solutions, including E-Invoice, Forecasting, Master Data Management (MDM), and a Supplier Portal to enhance operational efficiency.
 - Implemented key features such as bulk CSV uploads, real-time status tracking, automated PDF generation, and SAP integration for digital invoice management.

- Applied microservices concepts to develop modular and scalable components, improving system maintainability.

Company Profile & Content Management System (CMS) | Full-Stack Developer

- **Tech Stack:** Angular, NestJS, PostgreSQL
- Built and developed dynamic company profile websites with custom CMS, enabling non-technical teams to update content independently.
- Designed a modern, responsive user interface (UI) and optimized website performance for a better user experience.

Village Document Service System | Web Developer

- **Tech Stack:** Laravel, MySQL
- Created a web-based administrative system for a local village government to streamline the document request process for citizens, improving public service efficiency.
